Summary

- 10+ years of experience delivering enterprise **data engineering, analytics, governance, AI, and cloud solutions** across investment management, banking, and financial services.
- Data governance and data platform specialist skilled in **data product management, data quality, metadata management, lineage, controls, compliance, and enterprise data operations**.
- Built production-grade **Generative AI, RAG, and Agentic AI solutions** using AWS Bedrock, LangChain, LangGraph, MCP connectors, vector databases, and enterprise knowledge repositories.
- Built and deployed **cloud-native web, data, and AI platforms** using React, TypeScript, Python, Flask, FastAPI, Docker, Kubernetes/EKS, AWS Lambda, API Gateway, Terraform, GitHub Actions, REST APIs, and CI/CD pipelines.
- AWS Certified Solutions Architect Associate and Tableau Server Certified Associate with proven ability to deploy **enterprise analytics, AI, and self-service data platforms**.

Experience

- **Associate, Data Governance, Data & Advanced Analytics** — Toronto, Canada
  Canada Pension Plan Investment Board (CPP Investments) — *Aug 2020 - Present*

  Enterprise AI, Data Products & Agentic AI Initiatives
  - Built an **AI-powered Data Product Readiness Assistant** that consolidated governance scorecards, data quality assessments, metadata standards, lineage documentation, operational controls, approvals, and sign-off evidence into a conversational workflow, accelerating production readiness reviews and governance committee decision-making.
  - Developed **Conversational AI Assistants for Risk and Investment data products**, enabling risk managers, investment analysts, front-office stakeholders, data stewards, and reference data teams to query data products, risk metrics, incidents, lineage, ownership, and controls, augmenting traditional reporting with contextual explanations and self-service insights.
  - Built **Enterprise Knowledge and Incident Intelligence** capabilities combining governance repositories, operational metadata, historical incidents, and enterprise documentation to support impact analysis, root-cause investigation, incident triage, and data product health monitoring for critical investment and risk datasets.
  - Partnered with data stewards, reference data teams, risk managers, and technology teams to improve **AI readiness** by enriching business, technical, operational, lineage, and column-level metadata, documenting source-to-target transformations, and improving explainability, trust, and response accuracy of AI systems.
  - Designed and deployed production-grade **Agentic AI and RAG solutions** using AWS Bedrock, Claude, LangChain, LangGraph, MCP connectors, PGVector, Pinecone, Weaviate, semantic search, embeddings, and multi-agent workflows; integrated with Confluence, Jira, ServiceNow, PostgreSQL, governance repositories, and operational systems.

  Application, Cloud & Platform Engineering
  - Designed and delivered **cloud-native web applications, APIs, and data products** using React, TypeScript, JavaScript, Python, Flask, FastAPI, AWS Lambda, API Gateway, Docker, Kubernetes/EKS, and REST APIs to support data product health, governance readiness, data quality, SLA compliance, incidents, and operational KPIs.
  - Built scalable **AWS-native data and AI applications** using Bedrock, Lambda, API Gateway, S3, Athena, MWAA, EKS, Docker, and Kubernetes, enabling secure enterprise data, analytics, governance, and AI use cases.
  - Implemented **CI/CD and Infrastructure-as-Code practices** using GitHub Actions, Terraform, Docker, Kubernetes, Git, automated deployments, containerization, and DevOps practices to improve delivery efficiency and platform reliability.
  - Developed **business readiness and start-of-day monitoring dashboards** that consolidated data quality, SLA, governance, incident, and operational metrics to identify bottlenecks and communicate business-critical status through APIs and executive-ready interfaces.

  Data Governance & Data Platform Leadership
  - Led cross-functional teams across USA, Canada, and India to deliver enterprise data governance, data pipeline, metadata management, and data quality initiatives on AWS, achieving 95% data quality across domains.
  - Implemented data profiling and data quality rules using Python, PySpark, Great Expectations, AWS Glue Data Quality, and AWS Managed Airflow (MWAA).
  - Managed enterprise data portal and governance platforms including AWS DataZone, Collibra, and Ataccama, partnering with data stewards on metadata management, data cataloging, lineage, and governance controls.

- **Senior Consultant, Business Intelligence & Data Analytics** — Vancouver, Canada
  Groundswell Group Inc (Acquired by Deloitte Omnia AI) — *May 2018 - Aug 2020*
  - Collaborated with business leaders to design mission-critical KPI scorecard dashboards using Tableau, including server

administration and a BI Community of Practice.
  - Spearheaded implementation of Data Governance processes using Collibra for metadata and data lineage management.
  - Constructed semantic layers in Tableau for secure analytics and seamless data integration.
  - Integrated Tableau with R and Python for machine learning models and administered SAS Enterprise Analytics for advanced analytics.
- **Business Intelligence Analyst - Performance Management Analytics** Toronto, Canada
  Royal Bank of Canada *Sep 2017 - Dec 2017*
  - Designed interactive dashboards using Oracle Business Intelligence for data-driven decision-making.
  - Created ETL data pipelines using SAS SQL for Personal and Commercial Banking sector requirements.
  - Migrated critical legacy reports to Tableau dashboards, enhancing accessibility while preserving business insights.
- **Business Intelligence Developer** Chennai, India
  LTI - Larsen and Toubro Infotech *Jun 2014 - Jul 2016*
  - Designed data warehousing solutions for Unitrax, a SaaS-based Banking and Finance platform.
  - Implemented data warehouse solutions using Informatica and IBM DataStage, automating ETL processes through UNIX shell scripting.
  - Delivered MicroStrategy dashboards communicating key financial KPIs and maintained DB2 database schemas with row-level security for a multi-client environment.

Education

- **University of Waterloo** Waterloo, Canada
  Master of Management Sciences & Graduate Diploma in Data Analytics *Sep 2016 - Apr 2018*
- **Anna University** Chennai, India
  Bachelor of Engineering in Electronics and Communication *Aug 2010 - May 2014*

Technical Skills

- **Programming & Application Development:** Python, SQL, TypeScript, JavaScript, React, HTML5, CSS3, R, GraphQL, UNIX Shell Scripting, Flask, FastAPI, REST APIs, Bootstrap.
- **Generative AI & Agentic Systems:** AWS Bedrock, Claude, OpenAI, LangChain, LangGraph, RAG, Agentic AI, Multi-Agent Systems, MCP, Prompt Engineering, AI Governance, Human-in-the-Loop workflows.
- **Vector Search & Knowledge Retrieval:** PGVector, Pinecone, Weaviate, Semantic Search, Hybrid Search, Embedding Models, Context Engineering, Metadata-Enriched Retrieval, Document Chunking Strategies.
- **Cloud, DevOps & Platform Engineering:** AWS, Azure, GCP, Docker, Kubernetes, EKS, Terraform, GitHub Actions, CI/CD, Git, Lambda, API Gateway, S3, Athena, MWAA, Hadoop, Spark.
- **Data Governance, Quality & ETL:** AWS DataZone, AWS Glue Data Quality, Collibra, Ataccama, Great Expectations, DBT, Informatica, IBM InfoSphere DataStage, SAS Data Integration Studio.
- **Databases & BI:** PostgreSQL, AWS Redshift, SQL Server, Oracle, DB2, Teradata, MySQL, BigQuery, MongoDB, Neo4j, Tableau, Power BI, QuickSight, MicroStrategy.

Certifications

- Tableau Server Certified Associate (Tableau Software)
- AWS Certified Solutions Architect (Amazon Web Services)
- Tableau Data Scientist (Tableau Software)
- Tableau Server Architect (Tableau Software)
- Collibra Expert I (Collibra)
- Data Analytics Certificate (Indian Institute of Technology, Madras)
- Advanced Google Analytics Certificate (Google)
